

# CERSA Communications Internship 2025

## Essential Job Duties:

The communications intern will be working in the Center of Excellence for Regulatory Science in Agriculture (CERSA) to implement specific communications projects to publicize the work of the Center. These include workshop development, social media, and website development.

We are looking for full-time undergraduate or graduate students at NCSU or LSU, preferably majoring in either communications, marketing, or agriculture, or minoring in science communications. This paid internship allows students with an interest in communication and research the chance to gain valuable experience in science communication.

The intern must possess strong written and verbal skills. The intern will work with the CERSA communications team to produce external communications. This will include but isn't limited to newsletters, social media content, print publications, podcasts, and press releases. The position will work with university researchers, College of Agriculture and Life Sciences experts, and industry partners. Experience producing/editing communications products including Adobe Premier, Canva, or other video/audio editing software is strongly preferred.

This position will be housed under the Center for Integrated Pest Management (CIPM) at NC State University. You will be expected to attend regular communications team meetings at CIPM and collaborate with them as needed.

## Projects available to contribute to CERSA include:

Newsletter

Website

Workshop/Event Planning

Agtech 360 Podcast

Marketing, Promotional Videos and Informational Videos (you may collaborate with CIPM Communications for some of these opportunities)

Social Media (currently LinkedIn and Instagram)

## Position Information

Work Schedule: Up to 20 hours per week, Monday-Friday

Hybrid or in-office position
